Professional Summary

Student at the Egyptian Russian University, majoring in Management Information Systems, with strong skills in database management, system analysis and design, and backend development. Experienced in using PHP and the Laravel framework for backend development, with proficiency in data visualization tools like Tableau, Power BI, and Excel. Through academic projects and training, Honed expertise in SQL, data analysis, and programming. Eager to leverage my technical knowledge and problem-solving skills in a practical environment that fosters my growth and contributes to organizational success.

Education

Egyptian Russian University

Bachelor of Management Information System

October 2022 – Present

Cairo, Badr

Internships

Information Technology Institute (ITI)

July 2024 – August 2025

Trainee PHP Backend Developer

Cairo, Egypt

- Completed a practical backend development track focusing on PHP, MySQL, OOP, and MVC architecture.
- Enhanced dynamic and secure web applications using Laravel, including a fully functional e-commerce website.
- Collaborated in a simulated professional environment, integrating backend logic with front-end frameworks and following best practices in software development

Amoun Pharmaceutical Co.

August 2025 – August 2025

Business Technology Intern

Cairo, Egypt

- Gained hands-on experience with pharmaceutical software and technology infrastructure.
- Expanded a PHP & MySQL ticketing system blended with Inventory Management and Parts Movement.
- Assisted in streamlining operations and tracking for the company.

EYouth Internship

January 2025 – April 2025

Freelance Web Developer Intern by the Ministry of Communications and Information Technology

Cairo, Egypt

- Contributed to the development of 2 responsive websites using HTML, CSS, and JavaScript.
- Enhanced website performance by 20% through optimization and modern design techniques.
- Collaborated with 2 clients to deliver custom web solutions, meeting project deadlines effectively.

Route IT Training Center

October 2024 – May 2025

Trainee PHP Backend Developer

Cairo, Egypt

- Completed a practical backend development track focusing on PHP, MySQL, OOP, and MVC architecture.
- Improved dynamic and secure web applications using Laravel, including a fully functional e-commerce website.
- Worked on hands-on projects involving database design, backend logic, and integration with front-end components.

Projects

Hotel Booking System | Laravel, Bootstrap, JavaScript, MySQL, Stripe

- Developed a full-stack hotel booking platform with secure authentication (Admin/User) and GitHub OAuth integration.
- Applied CRUD operations for rooms and bookings, including approval/rejection with automated email notifications.
- Integrated Stripe payments for real-time, secure transactions and RESTful APIs for rooms, bookings, gallery, and messages.
- Built a responsive, production-ready application with full role-based access control and real-time interactions.

E-Commerce Platform | Laravel, Bootstrap, JavaScript, MySQL

- Developed a full-stack E-commerce platform using Laravel and Bootstrap, integrating RESTful APIs for product management, user authentication, cart operations, and order processing (tested with 50+ products).
- Enhanced user experience with real-time payment gateway integration and optimized performance for both mobile and desktop devices, ensuring scalability and security
- Built a responsive, production-ready application with full role-based access control and real-time interactions.

Ordering System| PHP, MySQL, HTML, CSS, JavaScript

- Implemented a responsive E-commerce website using PHP and JavaScript, integrating MySQL for efficient product and user data management, with a focus on security and performance.
- Executed key features like cart, product details, and user authentication, ensuring seamless navigation and functionality across devices (tested on 5+ screen sizes).

Dynamic Blog Management System | PHP, MySQL, HTML, CSS

- Built a responsive blogging platform with secure authentication, improving content publishing efficiency by 25%.
- Focused on secure login systems and a clean admin UI, ensuring seamless content management and functionality across devices.

Technical Skills

Languages: PHP, Python, C#, C++, HTML/CSS, JavaScript, MySQL

Developer Tools: Visual Studio, Git, GitHub, Docker.

Technologies/Frameworks: Laravel, Bootstrap, MVC, REST APIs, Linux, some knowledge of React, JSON.

Concepts: Object-Oriented Programming (OOP), Data Structures, Software Development Life Cycle (SDLC), Design Patterns, Agile Methodology, Version Control, SOLID Principles, Normalization, Indexing Database Design – ERD, DFD, Schema Design, UML

Soft Skills

Soft skills: Teamwork, Problem Solving, Communication, Time Management, Critical Thinking.

volunteering experience

Google Developer Student Club	September 2023- Present Egyptian Russian University
• Participated as an active member in GDSC events and initiatives. • Supported student engagement by attending tech workshops and helping promote educational activities across campus	

Accomplishments
